

Data Retention & Disposal Policy (Provisional)

Data Retention and Disposal Policy (ReWrite LLC) - Provisional

****Owner:**** James Brady (Founder) - james@jamesbrady.org

****Scope:**** All data processed by the EA/automation platform, including connected-source content, logs, backups, and derived artifacts.

1. Principles

- Collect the minimum data necessary.
- Retain only for the purpose collected or legal obligation.
- Delete or anonymize when no longer needed.

2. Default retention periods

- User account data: retained while account is active; deleted within 30 days of deletion request or termination.
- Connected-source data (email, calendar, messages, lifelog, finance): retained while the connection is active; removed within 30 days after revocation or deletion request.
- Task/action artifacts and embeddings: purged within 30 days of source removal.
- System logs (app/exec/audit): 90 days unless required longer for security investigations.
- Backups: 30-60 days rolling; deleted on schedule; restoration deletes follow within the same window.

3. Deletion triggers

- User-initiated deletion or revocation.
- Contract termination.
- Expiry of retention timer.
- Incident-driven purge (e.g., suspected compromise).

4. Deletion process

- Mark for deletion; revoke access tokens; queue purge jobs.
- Delete from primary stores, search/vector indexes, and backups on next cycle.
- Verify completion; record in deletion log.

5. Exceptions

- Legal hold pauses deletion until release.
- Aggregated/fully anonymized data may be retained for analytics.

6. Review

- Policy reviewed annually and after material changes to data flows or regulations.
